Options:

- Customised front cover

Usage:

- Compatible with CBD2, CBD3, CBD4, and CBD5
- Approved according to: EN 60335-1 and UL 962

The DPA (Desk Panel Adjustable) is a small, compact control panel for adjusting the desk.

The DPA is a flexible unit, which is easy to mount in different ways and to adjust in different positions. The DPA is compatible with most DESKLINE® systems.

The Desk Panel is used to operate the DESKLINE® system. The two arrow buttons are used for parallel drive.

The arrow buttons start parallel drive. The function is only activated when holding the button down.

[illegible]

This diagram illustrates the electrical connection for the desk. It shows a power cord with a standard three-prong plug being inserted into a power switch. The power switch is then shown being plugged into a standard wall outlet. A callout line points from the power switch to the outlet, indicating the connection point.

The DPA can be mounted on the desktop so that the keys are either facing upwards or outwards. Alternatively the DPA can be mounted flat under the desktop with the keys facing downwards.
