

RACKMOUNT REAR EQUIPMENT SHELF, 19" EIA

This unit supports the rear of heavy equipment mounted at the front of the Rack Module. It can be attached to the front or back (if accessible) of the rear rack rail angles.

1. At desired location in Rack Module, align holes in flanges of rear shelf unit with threaded holes in rear rack rail angle. The flanges can attach to the front or back side of the rear rack angle depending on accessibility. (Figure 1)
2. Fasten to angle using four (4) #10-32 x 5/8" phillips screws and 1/4" ID x 1/2" OD washers (optional) per shelf. Securely tighten all screws.

RACKMOUNT SHELVES, STATIONARY & ROLL-OUT, 19" EIA

15" (381) Depth Shelves

1. At desired location in Rack Module, align holes in flanges of shelf with threaded holes in front rack rail angle. Fasten to angle using four (4) #10-32 x 5/8" phillips screws and 1/4" ID x 1/2" OD washers (optional) per shelf.
