

RACK MOUNT DUCT, VERTICAL & HORIZONTAL

The Rack Mount Cable Duct is designed to mount on the front side of the Rack Module.

Installing Vertical Duct

1. Remove duct cover. At desired location, align holes in duct with threaded holes in the face of the rack rail angle. Fasten duct to rack rail with two or more #10-32 x 5/8" phillips screws.

Installing Horizontal Cable Duct.

2. At desired location, position horizontal cable duct plate over the rack rail angle. Fasten to rack rail using four (4) #10-32 x 5/8" phillips screws.

Complete installation

3. Lay-in cabling as required. Duct fingers or fingers and sidewall can be broken away providing additional access for wire leads.

4. Enclosed ducts with the duct cover when wiring is completed.

Note: #10-32 x 5/8" phillips screws (RMSHP) are not provided with Rack Mount Cable Duct, they must be ordered separately.
