The DPH is a small panel for adjusting tables. This new desk panel is made of foil and does only have the basic up and down function. The DPH is meant to be mounted per example into the table top of an office desk or kitchen table.

Because of the very small size the DPH is very easy to integrate in the design of the table. Another advantage of the DPH is that the customer has the possibility to choose standard colours, but also customized versions are available.
